

Test Cases	Pre condition	Expected Result	Actual Result	Post condition	Pass/Fail	Test Owner
Test cases for Login page						
Verify the presence and visibility of login page elements:					<input type="checkbox"/>	
Test valid login credentials:					<input type="checkbox"/>	
Test invalid login credentials:					<input type="checkbox"/>	
Test empty fields:					<input type="checkbox"/>	
Test password case sensitivity:					<input type="checkbox"/>	
Test username case sensitivity:					<input type="checkbox"/>	
Test account lockout:					<input type="checkbox"/>	
Test "Remember me" functionality:					<input type="checkbox"/>	
Test Remember Me functionality with multiple users:					<input type="checkbox"/>	
Test "Forgot password" functionality:					<input type="checkbox"/>	
Test concurrent sessions:					<input type="checkbox"/>	
Test password strength requirements:					<input type="checkbox"/>	
Test for Cross-Site Scripting (XSS) vulnerabilities:					<input type="checkbox"/>	
Test for Cross-Site Request Forgery (CSRF) vulnerabilities:					<input type="checkbox"/>	
Perform performance testing:					<input type="checkbox"/>	
Localization testing:					<input type="checkbox"/>	
Test session timeout:					<input type="checkbox"/>	
Test concurrent login sessions:					<input type="checkbox"/>	
Test account recovery:					<input type="checkbox"/>	
Test social media login integration:					<input type="checkbox"/>	
Test password reset link expiration:					<input type="checkbox"/>	
Test login page performance under load:					<input type="checkbox"/>	
Test browser compatibility:					<input type="checkbox"/>	
Test accessibility compliance:					<input type="checkbox"/>	
Test error handling:					<input type="checkbox"/>	
Test password complexity requirements:					<input type="checkbox"/>	
Test login with expired credentials:					<input type="checkbox"/>	
Test login with temporary credentials:					<input type="checkbox"/>	
Test login with multi-factor authentication (MFA):					<input type="checkbox"/>	
Test login with account inactivity:					<input type="checkbox"/>	
Test login with blocked or deactivated account:					<input type="checkbox"/>	
Test password reset process:					<input type="checkbox"/>	
Test login page behavior during maintenance:					<input type="checkbox"/>	
Test login page behavior with CAPTCHA:					<input type="checkbox"/>	
Test login page behavior with password visibility toggle:					<input type="checkbox"/>	
Test login page behavior with browser autofill:					<input type="checkbox"/>	
					<input type="checkbox"/>	
Test cases for Registration pages:						

					<input type="checkbox"/>	
Verify the presence and visibility of registration page elements.					<input type="checkbox"/>	
Test valid registration.					<input type="checkbox"/>	
Test registration with an existing username.					<input type="checkbox"/>	
Test registration with an existing email address.					<input type="checkbox"/>	
Test registration with invalid email format.					<input type="checkbox"/>	
Test registration with a weak password.					<input type="checkbox"/>	
Test registration with mismatched passwords.					<input type="checkbox"/>	
Test registration without entering a username.					<input type="checkbox"/>	
Test registration without entering an email address.					<input type="checkbox"/>	
Test registration without entering a password:					<input type="checkbox"/>	
Test registration without confirming the password.					<input type="checkbox"/>	
Test registration with special characters in the username.					<input type="checkbox"/>	
Test registration with a long username.					<input type="checkbox"/>	
Test registration with a long email address					<input type="checkbox"/>	
Test registration with a long password.					<input type="checkbox"/>	
Test registration with leading or trailing spaces in the username.					<input type="checkbox"/>	
Test registration with leading or trailing spaces in the email address and Password.					<input type="checkbox"/>	
Test registration with SQL injection attempts in the input fields.					<input type="checkbox"/>	
Test registration with XSS (Cross-Site Scripting) attempts in the input fields.					<input type="checkbox"/>	
Test the performance of the registration process under normal load:					<input type="checkbox"/>	
Test the performance of the registration process under high load:					<input type="checkbox"/>	
Test the responsiveness of the registration page on different devices and screen sizes:					<input type="checkbox"/>	
Test the compatibility of the registration page with different browsers and versions:					<input type="checkbox"/>	
Test the localization of the registration page by entering information in different languages:					<input type="checkbox"/>	
Test the accessibility of the registration page for users with disabilities.					<input type="checkbox"/>	
Test the error handling and display of appropriate error messages for different scenarios:					<input type="checkbox"/>
